## SUMMARY

QA Engineer with experience in test automation and software development for internal business groups. Versatile and enthusiastic team member with strong communication skills, a passion for learning new technologies, and the curiosity required for complex testing and technical investigation. Currently focused on leveraging UiPath platform for test automation and RPA.

## PROJECTS

### EPIC UI AUTOMATION AUTOMATION DEVELOPER

- Redeveloped existing Epic Ui Automation program with UiPath Platform, enabling automated testing of Providence’s electronic medical record system over Citrix.
- Developed custom framework and libraries to enable rapid expansion of additional enhancements.
- Resulting processes reduce manual effort by hundreds of hours for each testing wave.

**Technologies:** UiPath Studio, UiPath Orchestrator, UiPath Citrix Extension, Excel

### LABOR SWEEP TEST AUTOMATION AUTOMATION DEVELOPER

- Developed automated project and timecard creation for downstream integration testing of Providence’s Oracle Genesis ERP migration.
- Reduced manual testing by 85%, increasing test quality for high-impact labor capitalization process.

**Technologies:** UiPath Studio, UiPath Orchestrator, SharePoint, Excel

### MIRA INSURANCE REFERENCE APPLICATION SOFTWARE DEVELOPER

- Designed and developed a web application to help the Providence healthcare staff of clinics and hospitals accurately register patient insurance.
- Managed time efficiently to ensure punctual delivery for testing and production roll-out dates.

**Technologies:** .NET Core MVC, Entity Framework, Razor, Bootstrap, and MS SQL
